

Modeling of a monitoring system for mood disorders' patients

Software used: MS Access, Visual Basics for Applications, Adobe XD

Team 14 – year 2022

- List of the logins of the users that have the best representation (the most data inserted):

Username: 2 Password: es for the SP

Username: 5 Password: ds for the TA

Username: 8 Password: am for the patient

Other users ID and passwords can be found inside the user database

- Use MS Access in ENGLISH version (elsewhere typos problems occur and connection is not possible for all users)
- Be careful on some pages to fill all fields to avoid bugs.
- If bugs occur, new log in is required.
- Some files can be uploaded for the HP and BP values
- Statistics visualization should be done from 01/04/2022 to 01/07/2022 for the therapy adherence, glycemia, blood pressure in-hospital in order to get enough value to plot.
